Emergency Preparedness – TABLETOP EXERCISE :: RSVP Please

The CMS Emergency Preparedness Rule is now in effect and requires, among other things, that health facilities test or exercise their plans at least annually. This Table-Top Exercise (TTX) will give you the tools to create a TTX for your Health Center: A tabletop exercise is a group discussion led by a facilitator, using a narrated, clinically relevant emergency scenario, and a set of problem statements, directed messages, or prepared questions designed to challenge an emergency plan.
